You should probably be 1200+ to read it and up to 2000; but then it can be read over and over, as you'll learn something every time. 10 of 10 people found the following review helpful. Enlightening By Paine Sun I acquired this book when I was ready to take my chess skills to the next level. I was a Class D player (1300s) at the time, and am now a Class C player hoping to break into Class B. The book presents a plethora of scenarios which are fun and challenging. It explains the moves and traps very well. I spent many weekends setting up the hypos on my

chess board, and enjoyed every single trap, failure and explanation. Thanks to this book, my chess moves are much more refined than they used to be. Highly recommended. 1 of 1 people found the following review helpful. Classic for a Reason! By Brandon It is a classic for a reason! I was hesitant to get this book at first. Now, I'm glad I got it! I know why a National Master recommend this book to me now. I'd recommend you have knowledge of strategy and basic tactics before going through this book. It's one of those books you'll continue to go back through as you become a stronger chess player.
