I would love to see more of their work. Thank You. 9 of 9 people found the following review helpful. A perfect reference for American Modern Dance. By A Customer Art Performs Life is a unique and authoritative guide to the works and view points of today's most prominent 3 American Choreographers. It emphasizes on the collision of dance and life. Their view points on the gendering of dance and technique are stated clearly. The political and social agenda the choreographers use and their individuality in representing life on stage using major issues is brilliantly represented in this book. It is a must have for anyone interested in modern dance. 1 of 1 people found the following review helpful. Good Resource. By A Customer This book is a good read. I recommend it for the individuals interested in history, collaborative arts and innovative ideas and techniques in the performing arts.

Recognizing the importance of performance in 20th century avant-garde art, this catalogue traces the careers of three artists who have each made a significant contribution to that history. Merce Cunningham, Meredith Monk and Bill T. Jones.
