The Greek game Petteia (aka Poleis, Polis, City, Cities, Pessoi, or Pebbles) is played on boards of varying sizes with black and white stones initially lined up on opposite sides. The objective is to capture or immobilize an opponent's stones by sandwiching them between two others. Above is shown the starting arrangement for Petteia on an 8x8 board. This military style game that Plato called Petteia (meaning pebbles, stones, or pawns) is also sometimes called 'Poleis' or 'Polis' which means 'city' or 'cities' although these terms may have actually referred to the board itself, or the spaces on the board. Aristotle and Polybius also called this game Petteia, although some other writers used different names for it, including 'pessoi' (pebbles). Some later Greeks seem to have used the name Petteia to refer to Tabula, leading some modern sources suggest that Petteia may have been the name of a class of board games. Scripts are in Greek. The board games are copyrighted.
