Fraser A. McKen : Australian Acrostics before purchasing it in order to gage whether or not it would be worth my time, and all praised Australian Acrostics:

Here is a collection of acrostic puzzles whose questions are mainly about Australia and whose solutions are excerpts from the writing of a published Australian author. In addition are short notes accompanying each solution which offer a short biography of the author and tell a bit more about what the book is about. The landscape presentation of puzzles and solutions in raised letter format makes the book easier for readers with disadvantaged eyesight. Additionally, these puzzles may be useful in high school classrooms as a group activity for students of Australian literature and history.
