Title: Best Foot Forward Author Photographer: Eric LaPrice Publisher: Booker Press ISBN: 978-0-615-74248-9  
In photographer Eric LaPrice's Best Foot Forward, he's gone feet first portraying women's feet from the most alluring to the basic. He shows us that feet can be expressive of the person they belong to perhaps even more so than a portrait, states the jacket cover of this coffee table book. At one hundred and twenty pages, the full color pages of professional photographs target those who have a foot fixation or love viewing women's feet. With no table of contents, the hardbound book has an introduction, is divided into eight chapters, and ends with eighteen pages of photographic thumbnails with detailed descriptions including name, location, shoe size, and information. Acknowledgments and footnotes involving cameras used are also included. Focusing on specific topics such as high heels, pumps, sandals, toe rings, anklets, pedicures, tattoos, and naked feet, there are small to full page photographs of only females' feet, each listed with the person's first name. From casual to glamorous, thin and narrow to wide or high arched, tanned, painted, jeweled, and shapely are shown. In addition to the detailed illustrations, inserted paragraphs in each chapter are enlightening, interesting, and engaging. Here are some quoted tidbits per section of uncommon notes:  
Head Over Heels: In 1791, Napoleon banished high heels in an attempt to establish equality.  
Somethings Afoot: Due to women wearing long skirts that covered their footwear, it was generally less extravagantly decorated than men's footwear.  
Footloose and Fancy Free: The oldest known sandals (or shoes for that matter) were found in 1938 in Fort Rock Cave in Oregon.  
Toe the Line: It is more comfortable to wear stacked narrow toe rings than a single wide toe ring.  
Charmed, My Foot: Bobby Soxers wore anklets to enhance the appearance of their white socks.  
On Your Toes: Did you know Quentin Tarantino generally features a pair of beautiful bare feet in his movies?  
Take a Walk on the Wild Side: In 2011, even a Barbie doll sported a tattoo.  
The Naked Truth: The widespread belief in the United States that

there are laws that prohibit driving barefoot has been debunked as an urban legend. Even if the reader does not have a fetish for the foot, this compilation of photographs and written facts makes an interesting conversational tabletop book once the reader opens the cover. Thanks to To Press and Beyond for furnishing this book in exchange for a review based on the readers opinions. 0 of 0 people found the following review helpful. Beautifully shot, charmingly written By Customer This book is great from several angles--it is sprinkled with wryly humorous historical tidbits interspersed with beautifully framed shots, which make it a great addition to any coffee table. As a book of photography, it is first rate; every shot is lovingly composed and causes you to look at the subject matter in a different light. And the shoes are gorgeous...let's just say that I might need a bigger closet. Highly recommended!

An entire play on the English idiom "Put your best foot forward." The book contains many full color photographs of how women are putting their best foot forward. There is a section on high heels, a section on flats, section on sandals, a section on pedicures, a section on tattoos, a section on toe rings, and a section on other foot jewelry.

About the Author Eric La Price was born in Erie, Pennsylvania and is a graduate of Gannon University in Erie. He has photographed a variety of subjects over the years, including lightning, rainbows, wild animals, comets, covered bridges, meteor showers, wild horses, and dramatic scenics.
