of fun. The right amount of challenging. Not crazy hard but not easy either. 8 of 8 people found the following review helpful. Killer Puzzles By Kindle Customer This is my third book in the "Belt" series. Green was a nice diversion and Brown Belt puzzles were harder. The Black Belt stands up to its name with 150 very challenging puzzles. I usually work on one at night before sleep and each of the 14 puzzles I have done so far has taken several days to complete. At this rate it will easily be a year before I finish the book. If the five star newspaper puzzles don't keep you that busy, you will like this one. Highly recommended.

Kakuro language-free number puzzle that uses pure logic and requires just simple arithmetic to solve. This book is a part of a multilevel series of belt books, each containing 150 kakuros. These books take their cue from the belt colors in martial arts such as: white is for novices, and black for those consummate experts who crave a challenge.
