If not the best, chess player of all time !By Ye olde gardenerI have played...at...chess for 50 years against patzers like me, against computers, in some local tournaments and have played over thousands of games of all the legends in the history of chess, but am most amazed by fischer's games. He Just seemed to be able to see deeper into a position than anyone else. He makes moves in some of the games in this book that would be the last move I would consider and apparently the masters and grandmasters he was playing couldn't see that deeply into the game either ?!1 of 2 people found the following review helpful.
