From Brand: Cherry Lane Music : Pocket Beatles for Guitar before purchasing it in order to gauge whether or not it would be worth my time, and all praised Pocket Beatles for Guitar:

0 of 0 people found the following review helpful. Not for the blind
By Raul Torres I bought this book back in high school during one of those Beatle waves that seem to come and go from time to time I used it to play Beatle songs with my band it worked of course a little adjustment was required but it worked as years past by I lost the book now I finally got it back only to realize now I need glasses to read it I recommend it to any intermediate guitarist who is looking to expand their library
3 of 3 people found the following review helpful. Very Good Book : You can play them all.
By SF Hank I bought this, actual pocketbook, about 20 years back. I've used it a great deal and found that there's hardly a Beatles tune that I can't do pretty much on the fly. (Ok, so I remember most of the melodies....) That is the real strength of this book.. You won't find really complex chords and arrangements, or "How They Really Played It". What you will find is a song arranged so that average guitarists can make their way through and sound good. The keys are selected for singing each tune and are pretty much in reach of most people. They tell you what note to start singing on, as well as the whole melody line. Let's say that the sing along has usually worked better than I'd expected. My copy is now all brown crumbling, so I need another. Only \$170 ?
