I got my mother hooked on them after taking it with me one day to show her. We both agree that it's nice they can be solved simply with logic instead of having to make any guesses. 2 of 2 people found the following review helpful. Love it. By KHidato is nice progression from Sudoku. Same logic concept except you can progress further into the puzzle before realizing something is wrong. I can work

most Sudoku in pen. I usually prefer to work Hidato puzzles in pencil with an eraser nearby. I find them a little more challenging. I love the "Pocket Posh" books because they fit nicely into my purse and I can carry them until I'm through with them. They are a good size. 4 of 4 people found the following review helpful. Another good puzzle book from Pocket Posh By Lightbulb I just love the size and portability of these books! I have bought several other Pocket Posh books and they are all good. This one is all Hidato puzzles. I had never tried these before, but thought since I love sudoku I would probably like these. In these puzzles the object is to fill in the numbers so that you can count from 1 to the highest number with each consecutive number touching the one before it (above, below, or corner). The book says there is only one solution to each puzzle (which I still find hard to believe). Anyway, have a good pencil and eraser handy. There is some trial and error involved in these puzzles.

Complement your style while challenging your mind with this collection of 100 Hidato puzzle games. Hidato can be solved using 100 percent logic and requires no math or guesswork. The modern tactile design makes the book a stylish accessory that will go with anything and fit nicely into a purse or a pocket. The perfect gift for any female puzzler, Pocket Posh Hidato features an elastic band closure and hours of mind-sharpening fun.
