By Andrew
This is a great little book. It comprises illustrative games, with around three games per chapter. Each chapter follows a different line after 1. d4, d5 2.e4, dxe4 (this of course transposes from the Scandinavian Defence 1. e4, d5. 2.e4, dxe4) 3. Nc3, Nf6 4. f3, eXf3 5. Qxf3, Qxd4 6.Be3,... It also has a section in the back for other 6th moves that white can play. The great thing about this book is that each game has plenty of analysis of alternative lines after nearly every move, something you don't usually see in books with illustrative games. The other great thing is there are lots of diagrams so you can look through the lines in your head. Of course this book is only about the Ryder Gambit accepted. Not every player will accept the Ryder Gambit, indeed they shouldn't unless they want to lose. You will need to compliment this book with a Blackmar-Diemar Gambit book that covers Blackmar-Diemar declined and Ryder Gambit declined. The critically acclaimed 2011 "The Blackmar-Deimer Gambit: A modern guide to a fascinating chess opening" won't help because it does not cover the Ryder Gambit. I have not seen a review of a book that mentions that it covers the Ryder Gambit declined so I'm afraid at this point I can't suggest one.

My husband loves this book. This was a gift for my husband and will worth it, refers to it all the time.

The Ryder Gambit is a fun opening, one which gives rise to spectacular combinational possibilities. Even a player with limited experience can create a magnificent mating attack which can be shown to friends and kibbitzers and even published in local chess magazines. The fans of this opening are true lovers of this royal game and even if their enthusiasm is unjustified by objective analysis, it is nevertheless one of the joys of chess.

About the Author
Eric Schiller (born March 20, 1955 in New York City) is an American chess player, trainer, arbiter and one of the most prolific authors of books on chess in the 20th century. In 1974, Schiller was the Illinois Junior Champion. Schiller played for the University of Chicago team several times at the Pan American Intercollegiate Team Chess Championship. Schiller was the Hawaii action and blitz champion for 1988/89. He was an organizer of the Hawaii International chess festivals 1994-98 including 1998 US Open California Champion 1995. Later that year, he appeared as a chess advisor for the music group Phish on some of the stops for their "Chess Tour" where they played an ongoing game of two chess moves per tour stop and some "band vs. audience" partial games as part of their stage performance. Schiller was an arbiter at several notable games and championships including the FIDE World Chess Championship 2000. While Vladimir Kramnik and Garry Kasparov opted not to participate in the event, they had both endorsed Schiller for this sensitive role during the planning stages. As of April 2009, Schiller has a FIDE rating of 2166. He is also an International Arbiter and International Trainer.. Schiller's expertise and publications in the Flohr-Zaitsev Variation made him a sought-after expert when Gary Kasparov used that opening at the second game at the World Chess Championship 1990.
