**Scott Schuman : The Sartorialist** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Sartorialist:

Great book with beautiful pictures By Tamar T Great book with beautiful pictures, but personally i think there are better pictures on The Sartorialist: X book by the same author. 0 of 0 people found the following review helpful. Disappointed / Not As Inspiring As Expected / Wanted More Women's Fashion By ButterUpButtercup I returned this book because it wasn't as inspiring as I expected. I thought it would be like looking at the blog, but featuring the most interesting people. I lost interest after flipping through it a couple times

and was really wanting a book I could return to again and again for inspiration (like Design Sponge, but for fashion; I could flip through that book 100 times). For me, I think there were too many men shown and I was really only interested in women's fashion. 0 of 0 people found the following review helpful. Stylish !By CustomerIf you are wondering what is the definition of style, this book may help you. It is full of pictures of people who are all stylish from all walks of life and budgets. I particularly like the people who obviously got their clothes from their mother or father's closets or thrift shops but managed to look like a million bucks. I just wish I have the flair of these people. Buy this book. It will be an excellent reference source for that elusive thing called style.

Scott Schuman just wanted to take photographs of people on the street who looked great. His now famous blog ['the bellwether American site that turned photo blogging into an art form' New York Times] was an attempt to showcase the wonderful and varied sartorial tastes of real people - not only those of the fashion industry. The book is a beautiful anthology of Scott's favourite shots from around the world. They include photographs of well-known fashion figures as well as those shots of the anonymous passerby whose imagination and taste delight the viewer. From the streets of Rio to Beijing, Stockholm to Milan, these are the people that have inspired Scott and in turn, inspired designers and people of all ages, wages and nationalities with an interest in fashion. Intimately designed and created with Scott, the book is a handsome object in its own right, in full colour on hand-picked, quality paper.

A Look Inside The Sartorialist "More people notice me in The Sartorialist column than in any other publication or website. Obviously the place to be seen!" -Mario Testino Scott doesn't just take pictures, he captures emotion. He is not just a photographer. He's a historian marking the feelings of this generation one photo at a time. -Kanye West During all the fashion weeks I am approached by many photographers, Scott is the only one who can ask me to cross the street for better light and I do it! I love his portraits. -Carine Roitfeld, editor of French Vogue Everybody loves being photographed by Scott Schuman. If he spots you in the crowd, whether in New York or Paris or Milan, it's a kind of validation. And everybody likes to see who he has photographed for The Sartorialist, because it's proof of his critical eye. -Cathy Horyn, The New York Times About the Author About the Author Scott Schuman started The Sartorialist simply to share photos of people that he saw on the streets of New York that he thought looked great. Having worked in fashion industry for fifteen years, he felt there was a disconnect between what he was selling in the showroom and what he was seeing real people (really cool people) wearing in real life. The Sartorialist was his attempt to redress the balance. He began shooting people on the street in a way that he knew most designers hunted for inspiration. Since its beginning the blog has become hugely respected and influential in the fashion industry and beyond, and currently receives over 100,000 hits a day. Scott Schuman now has a monthly page in GQ, shoots regularly for many top fashion magazines around the world, covers all the fashion shows for Style.com, has had his photographs appear in the windows of Saks Fifth Avenue, appeared in a GAP ad himself, and has been picked by Time magazine as one of their top 100 design influencers. -- This text refers to the Paperback edition.
