If I had read those from other people who had tried the kindle edition I would never have purchased it. The puzzles are not interactive so unless you are able to do them completely in your head you would have to draw them on paper. My

feeling is that this is probably a very good book in paperback form but the kindle edition should never have been created at all. I ended up returning the book a few minutes after purchasing it. Also, a suggestion for , it should be possible to filter reviews for the kindle edition only. The filter should default to the edition currently being viewed. 0 of 0 people found the following review helpful. Not exactly what I expected By Kiril Reznikovskiy I expected to learn how to solve riddles. This book does offer a lot of riddles. What makes it unique though is its wide range of different types of mind bending puzzles. It is quite the challenge and worth the buy. 4 of 4 people found the following review helpful. Simply Innovative By C. Altay Unlike many puzzle books out there, this one contains all original and never-before-seen puzzles only. A treat the most avid puzzle fans may expect from any book by the Grabarchuk family of puzzle designers. 108 entertaining puzzles with detailed solutions from a diverse range of disciplines: Visual problems, mind benders, coin/matchstick puzzles and word challenges. A significant number of puzzles also include unexpected tricks to be discovered. Simply innovative, and not-so-simple indeed.

This collection of more than one hundred original and highly sophisticated puzzles presents challenges that require creative, outside of the box thinking. Many different types of puzzles are included, such as word, number, logical, visual, spatial, dissection, dividing, dot-connecting, matchstick, coin, and more. Each aesthetically appealing puzzle is designed to improve problem solving skills; train geometric, combinatorial, and spatial imagination; bolster visual perception and logical reasoning; and foster the development of a perseverant and self-confident approach to challenges.

This amazingly captivating book collects over one hundred original brain teasers conceived and tastefully designed by the Grabarchuk family. The book will be enjoyed by all puzzle lovers ... Zentralblatt MATH, February 2009 This collection of puzzles will provide many interesting, fun and enjoyable moments to anyone who solves them. It can be recommended to all readers who like solving brainteasers. European Mathematical Society Newsletter, September 2008 The collection of over one hundred puzzles will spark out of the box thinking and lead to 'aha!' moments that even Martin Gardner would appreciate. MAA s, July 2008 NPR's Next Week's Challenge This brainteaser comes from Serhiy Grabarchuk, Peter Grabarchuk and Serhiy Grabarchuk Jr., a family of puzzle makers in Ukraine. A calculator displays a five-digit number. The first four digits are 8735. These digits form a logical sequence. What is the fifth number in the series? NPR, June 2008 About the Author Serhiy Grabarchuk ran the Puzzles.COM website for almost three years. Since August 2005 he has run the Age of Puzzles project. His sons, Peter and Serhiy, Jr. support him in his puzzle work and are accomplished puzzlers in their own right. The Grabarchuk's live in Uzhgorod, a small town in the Western part of Ukraine.
