From Booth-Clibborn : Tokyo Adorned before purchasing it in order to gage whether or not it would be worth my time, and all praised Tokyo Adorned:

The neon, pastels, bows, and vibrant prints of Tokyos fashion tribes are unmistakable, outrageous, and fun. Recognized around the world, with huge online followings, the citys style icons are photographed here against white backgrounds, revealing a new dimension of personality and emotion in these remarkable individuals. Portraits include fashion icon Kumamiki the vision behind the Party Baby movement and clothing brand who has a growing global online following, as well as personalities such as Chocomelo, Saki Kurumi, and Haruka Kurebayashi. The book includes an introduction by Simon Doonan and a cultural critique by artist and writer Buzz Spector.
