Ivan Moscovich : Tough Topology Problems Other Puzzles (Mastermind Collection) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Tough Topology Problems Other Puzzles (Mastermind Collection):

Colorful geometrical pentagons, composed of pentagons and triangles and dissected into pieces: Can you put the shapes together again to form a whole? A classic paradox about the nature of motion from a famous Greek mathematician: Can you see what's wrong with it? Put on your thinking cap and prepare to give your math and logic abilities a workout, because these super-looking puzzles demand real brainpower. Solve a graphic problem that involves the calculation of a square root. Examine six linear processions of egg-carrying ants, and figure out which lines are surprising and which ones aren't. Go step by step through a multihued grid and try to find 32 different

configurations within. These puzzles are challenging, entertaining, and satisfying to unravel.
